To the parents and citizens we would say that during the past three years we have graded all the schools in town so that each pupil is doing exactly the same work in the corresponding grades.

We have been able to do this with the kind coöperation of the teachers. The number of pupils enrolled for the year are 95, divided as follows:

Eight Grade	10 pupils
Seventh Grade	16 pupils
Sixth Grade	14 pupils
Fifth Grade	11 pupils
Fourth Grade	16 pupils
Third Grade	9 pupils
Second Grade	12 pupils
First Grade	7 pupils

This course covers a period of eight years and finishes the grammar school work.

The average attendance has not been what it should and the parent is largely responsible for this; this low average daily attendance deprives us of a revenue from the state we should receive.

The first years of the course are given here only in outline, the following year more fully. With the exception of music, which we have been able to give only in a limited way, we have followed the course fully.

As only a small per cent. of the parents visit the schools during the year we give this outline so they may have some idea of what the school board and teachers are trying to do along this line.
